Collection Costs					\$ 750,000.00
Total Estimated for 15 yr completion					\$ 47,743,489.00
Total Estimated cost for completion at current pace and cost*					\$ 51,012,522.00
* This estimate is reflected in 2004 dollars and was arrived at by using the current funding levels and multiplying it by 3 years for the Compact Commission, 33 years for DNRC plus 5 years at the rate that will be required for post decree assistance, and 38 years for the Water Court (assuming it will take the Water Court 5 years to finish after DNRC has completed the examination process). This estimate assumes that a more aggressive on motion policy is not adopted. If a more aggressive on motion policy is adopted the cost will increase.
