

Districting & Apportionment Commission  
Legislative Services Division  
P.O. Box 201706  
Helena, MT 59620-1706

Commissioners,

Population Deviation

I fully embrace the "one person, one vote" philosophy and therefore suggest that high emphasis should be placed on the lowest population deviation possible (1%).

Geographic Boundaries

Consideration should be given to commuting (travel) patterns of people. Lines should be drawn along established roads and streets where possible. Lines should not cut over mountain divides, or cut through rivers and lakes.

Community Interests

Municipal boundary lines should be followed where possible to acknowledge interests of both rural and urban citizens.

By keeping deviation numbers small and recognizing commuting (travel) patterns of people I believe the committee will have a better chance of keeping community interests intact.

I thank you for the opportunity to offer suggestions.

I fully embrace the "one person, one vote" philosophy and therefore suggest that high emphasis should be placed on the lowest population deviation possible (1%).

Geographic Boundaries

Consideration should be given to commuting (travel) patterns of people. Lines should be drawn along established roads and streets where possible. Lines should not cut over mountain divides, or cut through rivers and lakes.

Community Interests

Municipal boundary lines should be followed where possible to acknowledge interests of both rural and urban citizens.

By keeping deviation numbers small and recognizing commuting (travel) patterns of people I believe the committee will have a better chance of keeping community interests intact.

I thank you for the opportunity to offer suggestions.

Consideration should be given to commuting (travel) patterns of people. Lines should be drawn along established roads and streets where possible. Lines should not cut over mountain divides, or cut through rivers and lakes.

Community Interests

Municipal boundary lines should be followed where possible to acknowledge interests of both rural and urban citizens.

By keeping deviation numbers small and recognizing commuting (travel) patterns of people I believe the committee will have a better chance of keeping community interests intact.

I thank you for the opportunity to offer suggestions.

Commissioners,

Population Deviation

I fully embrace the "one person, one vote" philosophy and therefore suggest that high emphasis should be placed on the lowest population deviation possible (1%).

Geographic Boundaries

Consideration should be given to commuting (travel) patterns of people. Lines should be drawn along established roads and streets where possible. Lines should not cut over mountain divides, or cut through rivers and lakes.

Community Interests

Municipal boundary lines should be followed where possible to acknowledge interests of both rural and urban citizens.

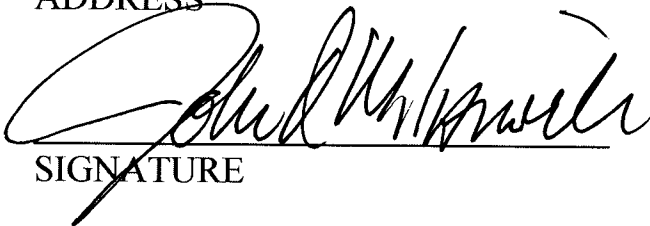

By keeping deviation numbers small and recognizing commuting (travel) patterns of people I believe the committee will have a better chance of keeping community interests intact.

Consideration should be given to commuting (travel) patterns of people. Lines should be drawn along established roads and streets where possible. Lines should not cut over mountain divides, or cut through rivers and lakes.

Community Interests

Municipal boundary lines should be followed where possible to acknowledge interests of both rural and urban citizens.

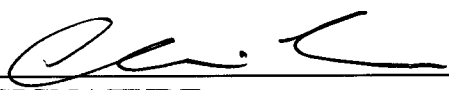

By keeping deviation numbers small and recognizing commuting (travel) patterns of people I believe the committee will have a better chance of keeping community interests intact.

I thank you for the opportunity to offer suggestions.

Commissioners,

Population Deviation

I fully embrace the "one person, one vote" philosophy and therefore suggest that high emphasis should be placed on the lowest population deviation possible (1%).

Geographic Boundaries

Consideration should be given to commuting (travel) patterns of people. Lines should be drawn along established roads and streets where possible. Lines should not cut over mountain divides, or cut through rivers and lakes.

Community Interests

Municipal boundary lines should be followed where possible to acknowledge interests of both rural and urban citizens.
