Subject: Support letter for DSA

Marty: Order # 10-01-D, as written, is a critical step in preventing and mitigating the spread of Brucellosis from the Greater Yellowstone Area (GYA). Boundaries for the Designated Surveillance Area (DSA) are outlined for surveillance. The order lists requirements for testing, individual identification, and Official Calftood Vaccination (OCV) for eligible animals. I want to commend you and the Montana Board of Livestock for this proactive order.
