

March 3, 2014

Mr. Russ Trasky
Montana Department of Revenue
Large Customer Team
PO Box 5805
Helena MT 59620-5805

Dear Mr. Trasky:

Enclosed with this letter is the 2013 Electric Universal System Benefits (USB) report for NorthWestern Energy. Copies of this report are also being provided to the Montana Public Service Commission and members of the Energy and Telecommunications Interim Committee of the Montana Legislature.

The report documents the revenues collected by NorthWestern Energy through the USB Charge; summarizes the qualifying expenditures made by the utility in the implementation of internal programs and activities, and the credits claimed; and documents the collection and reimbursement of the USB charge from NorthWestern Energy's Large Customers.

A total of \$9,485,951 in electric USB revenues was collected from NorthWestern Energy's electric distribution customers in 2013.

Approximately 41% of the 2013 USB funds, or \$3,879,499 was directed to Low Income activities by NorthWestern Energy. Large Customers self-directed activities accounted for 30% of the total 2013 electric USB revenues, or \$2,840,538 with \$117,775 self-directed to Low Income activities and \$2,297,516 self-directed to energy reduction activities. Allocations by NorthWestern Energy to the other public purpose categories are as follows: \$1,238,110 to Local Conservation, \$243,855 to Market Transformation, and \$1,283,947 to Renewable Resources and Research and Development.

Included with the 2013 report are updates for the 2009, 2011, and 2012 reports.

No USB funds collected from NorthWestern Energy customers are being released to Statewide USB funds.

If you have questions, please contact our USB staff at (406) 497-2491.

Sincerely,

Bill Thomas
Manager, Regulatory Support Services

**NorthWestern Energy
Universal System
Benefits Activities
2013 Annual Report**

March 2014

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Executive Summary

NorthWestern Energy is committed to administering Universal System Benefits (USB) programs and activities to efficiently deliver public purpose benefits to its Montana distribution customers to the fullest extent possible.

Since 1999, electric customers in NorthWestern Energy's Montana service territory have funded more than \$134 million of Universal System Benefits programs. Through USB, funding of low income programs have been increased, conservation and market transformation programs have continued, and renewable generation opportunities have been initiated for NorthWestern Energy's customers.

A total of \$9,485,951 was collected from NorthWestern Energy's electric distribution customers in 2013. This is \$113,592 more than 2012 revenues with Large Customer revenues up by \$70,818 over 2012 and non-Large Customer revenues up \$42,774 from 2012.

The 2013 electric USB funds have been allocated to the categories consistent with guidelines provided in Montana Public Service Commission (MPSC) Order No. 6679e. MPSC Order No. 6679e recognizes and allows for the pooling of electric and natural gas USB funds for residential audits, Free Weatherization for low income customers, and emergency energy assistance through Energy Share of Montana. As in past years, allocations have been adjusted between the Market Transformation and Local Conservation categories, and the Research, and Development and Renewable Generation categories. Because of anticipated demand for the low income bill discount in 2013, funds had been set aside from the Local Conservation/Market Transformation and Renewables/Research and Development to cover this shortfall. The anticipated electric bill discount demand did not materialize and \$591,214 was reallocated to supplement the funding for Energy Share of Montana and the Free Weatherization Program.

The mix of low income, conservation, and renewable generation programs in 2013 is similar to 2012.

Separate of the electric USB funded activities, NorthWestern Energy customers fund additional residential Local Conservation and Low Income activities with natural gas USB funds. Other energy efficiency programs are included in NorthWestern Energy's electric and natural gas supply portfolios and are funded through supply rates.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Of the 2013 electric USB revenues, \$3,879,499, or nearly 41% were allocated to Low Income activities by NorthWestern Energy separate of low income allocations from the Large Customer category. Large Customers self-directed an additional \$117,775 of their 2013 electric USB funds to Low Income activities, bringing the total of 2013 electric USB funds directed to Low Income to \$3,997,274, or more than 42% of the 2013 electric USB revenues.

NorthWestern Energy implements its USB programs and activities consistent with the requirements of legislation for USB, the Department of Revenue (DOR) administrative rules for USB Programs, and tariffs and orders of the MPSC. NorthWestern Energy's allocation decisions for 2013 are consistent with well-established past practices. To the extent that substantial changes to programmatic or funding levels have been made, these changes are noted in the appropriate activity summary.

The activities for 2013 are summarized and the qualifying expenditures and credits claimed by NorthWestern Energy are documented with this report. *No funds are being released to the Statewide USB fund(s).* Large Customers that self-direct their funds are required to separately report those activities. To the extent that a Large Customer has informed NorthWestern Energy that it has directed funds to Low Income activities, the totals have been reported.

This report includes brief highlights of activity in each category, a summary of the allocations of 2013 electric USB funds by category and activity, and a summary of the energy and demand savings and new renewable resources resulting from the 2013 allocations. The report also includes updates on previous years' activities, and a summary by public purpose category of electric USB funding from 1999-2013.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

UNIVERSAL SYSTEM BENEFITS REVENUES

NorthWestern Energy's Universal System Benefits Charge (USBC) tariffs went into effect January 1, 1999. As required in law, the tariffs were established to collect nearly \$8.6M (2.4% of 1995 revenues) in a weather-normal year based upon 1998 electric loads. The USBC generated \$9,485,951 in 2013. The table below shows that the USBC revenues are based upon electrical usage (kiloWatt hours or kWh), lists the USBC tariff rates by customer class, and the percentage of USB revenues each sector contributed in 2013.

General Description	Tariffed Customer Class	Rate/kWh	Percent
Residential	Residential	\$0.001334	34%
Commercial/Small Industrial	GS-1 & GS-2 under 1000 KW	\$0.001143	33%
Large Customer per USB	GS-1 & GS-2 over 1000 KW	\$0.000900	30%
Irrigation	Irrigation	\$0.001144	1%
Lighting	Lighting	\$0.003404	2%

An average NorthWestern Energy residential customer using 750 kiloWatt hours (kWh)/month pays about \$1 each month for electric USBC. The Large Customer USB rate of \$0.0009 per kWh was set by the Montana legislature.

Large Customers are those customers with an individual qualifying load greater than 1,000 kiloWatt (kW) average monthly demand in the previous calendar year. By law, Large Customers may self-direct their USB funds to qualifying public purposes. The Large Customer USBC rate is applied to the qualifying load and all associated demand-metered accounts. Large Customers, representing 54 customers and their 498 accounts, make up \$2.84 M of the USB revenues.

Appendix 1 provides additional information regarding USB revenues by customer class.

Segregated USB Account

NorthWestern Energy segregates its electric and natural gas USB funds from other utility operating funds by depositing them into a separate interest-bearing bank account, per MPSC Order No. 6504a. In 2013, the net gain in interest to USB was \$1,923 of which \$1,308 was credited to the electric USB categories on a pro rata basis and the balance was credited to natural gas USB activities.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

UNIVERSAL SYSTEM BENEFITS EXPENDITURES

All electric USB funds collected from NorthWestern Energy customers in 2013 have been spent and/or committed to qualifying public purposes. No funds are being released to the Statewide USB fund(s).

This report includes information about the 2013 USB programs and activities for NorthWestern Energy customers. Sections are provided for Low Income, Local Conservation, Market Transformation, Renewable Resources, and Research and Development. A general summary of the Large Customer self-directed activities is provided. NorthWestern Energy does not “qualify” Large Customer self-directed activities and therefore, only provides the funding obligation and basic expenditure information. See Appendix 2 for a summary of the 2013 allocations and expenditures and Appendix 3 for energy savings and customer participation information.

NorthWestern Energy’s mix of programs and activities have been guided by the MPSC through Orders No. 5986 f, g, and i; Order No. 6514; Order No. 6504a; Order No. 6574c; and Orders No. 6679a, b, c, and e; advice from members of NorthWestern Energy’s USB Advisory Committee; input from the Montana Department of Health and Human Services (MDPHHS) and local Human Resource Councils (HRCs) for the Free Weatherization program; NorthWestern Energy’s experience in program design and implementation; and in response to customer needs and market conditions.

As provided for in the Administrative Rules of Montana and Montana Statute, NorthWestern Energy implemented qualifying internal utility programs and activities in 2013 and has financial commitments to implement additional activities/projects for completion in 2014. These programs and activities are described in this report. The breakdown between qualifying expenditures in the current year and financial commitments for completion in 2014 is documented in Appendices 2 and 3 to this report.

NorthWestern Energy requested, and was granted by the DOR, time extensions for projects for which the timelines have been modified requiring more time for completion as reported in the Addendums for the 2011 and 2012 Reports. None of the projects to which 2013 funds have been committed are expected at this time to extend beyond 2014.

UNIVERSAL SYSTEM BENEFITS RESULTS

From 1999 through 2013, NorthWestern Energy has delivered USB benefits to various customer classes and across all public purpose categories. General descriptions of the activities or programs for 2013, along with the funding total for the category, follow.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Large Customers-- \$2,840,538

Large Customers are allowed to self-direct their USB funds by statute. Those who self-direct funds are required to file individual reports with the DOR regarding their activities. NorthWestern Energy is required to collect the USBC from these customers pursuant to Montana Statute through a tariff. Individual customers file reimbursement claims with NorthWestern Energy for which the utility processes payment. NorthWestern Energy does not pre-qualify Large Customer credits and bears no financial responsibility for any disallowance of their USB activities. Energy savings associated with Large Customer projects are not accounted for in NorthWestern Energy's report.

Large Customer revenues are included in the utility's annual USB obligation. Large Customers may self-direct their funds and do not have a minimum funding requirement for Low Income nor an obligation to fund any of the utility's activities. Likewise, Large Customers are not eligible to participate in NorthWestern Energy's USBC funded Efficiency Plus (E+) programs.

In 2013, \$2,840,538 was collected from 54 Large Customers to meet their 2013 obligations. All but three of these customers self-directed all of their 2013 USB funds. Large Customers self-directed \$2,297,516 of 2013 funds toward energy reduction projects within their facilities, and have carried over \$423,166 for additional projects in 2014. Large Customers self-directed \$117,775 to Low Income activities in 2013.

The unclaimed 2013 Large Customer funds in the amount of \$2,080 and the USB account interest amount of \$392 covered a portion of the NorthWestern Energy administrative costs for this category. \$11,866 from 2012 previously unspent Large Customer funds have been used to cover the remaining balance.

Claims to NorthWestern Energy for reimbursement are documented as received. Reimbursements are made after the USBC has been collected from the customer.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Low Income Activities--\$3,879,499

In Order No. 5986i, the MPSC directed the utility to allocate 21% of the total electric USB funds collected to Low Income activities and to reallocate any unspent Large Customer funds to Low Income activities. In 2005, the MPSC issued Orders No. 6574c, 6679a and 6679b, all of which served to increase the allocation of electric USB funds to the Low Income sector. MPSC Order No. 6679e (December 2008) made permanent the Low Income bill discount levels and established a Low Income allocation guideline as part of the direction to guide allocations amongst the electric USB categories.

NorthWestern Energy directed \$3,879,499 in 2013 electric USB funds to Low Income activities, or nearly 41% of electric USB revenues. Large Customers reported self-directing an additional \$117,775 to Low Income activities bringing the total 2013 funds committed to Low Income to \$3,997,274 or more than 42% of the total funds collected. In previous heating seasons, the demand for the low income electric bill discount exceeded the funding electric Low Income obligations as set forth in Order 6679e. Because of anticipated demand for the low income bill discount in 2013, funds had been set aside from the Local Conservation/Market Transformation and Renewables/Research and Development to cover this potential shortfall. The anticipated electric bill discount demand did not materialize and \$591,214 was reallocated to supplement the funding for Energy Share of Montana and the Free Weatherization Program for Low Income support in 2014.

Consistent with historic practice, unspent 2012 Large Customer funds and funds remaining after a 2009 Market Transformation project completed in 2013 have been directed to the 2013 Low Income category as noted on Appendix 2 to the 2013 report.

Appendix 4 to the 2013 report provides a summary of NorthWestern Energy's Electric USB allocations for 1999-2013 by category and better illustrates the low income reallocations.

Low Income USB funds are directed to a wide range of activities that benefit low income customers of the utility. Program offerings include bill assistance, weatherization and emergency energy assistance.

Households served by NorthWestern Energy that meet the LIEAP eligibility requirements receive bill assistance in the form of a discount, and may be eligible for weatherization services through the Free Weatherization Program. LIEAP eligibility guidelines are set by MDPHHS each heating season which is defined as November through April.

Higher income levels for LIEAP eligibility from November 2008 through April 2011 resulted in more NorthWestern Energy customers qualifying for bill assistance through

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

LIEAP for NorthWestern Energy's Low Income bill discount and greater demands on Low Income USB funds through mid-2012. The current LIEAP eligibility is set at up to 150% of the Federal poverty guidelines. Customers who had qualified at the higher income level are no longer receiving the NorthWestern Energy bill discount.

LIEAP qualified customers may also qualify for the Free Weatherization Program and households with energy emergencies may receive assistance through Energy Share of Montana.

More than 12,000 low income households were served in 2013 with electric USB funds. The financial impact of electricity costs on low income households was reduced through bill assistance, weatherization, and emergency energy assistance.

Bill Assistance

Consistent with MPSC Order No. 6679e the electric Low Income bill discount is 25% from November through April and 15% from May through October. Electric USB funds cover the electric Low Income discount. Separately, natural gas USB funds cover the natural gas USB Low Income Discount.

Customers qualifying for LIEAP, the federally funded heating assistance program, also receive the NorthWestern Energy bill discount. Customers may apply for LIEAP assistance through their local HRC. LIEAP eligibility guidelines were increased by MDPHHS during the 2008-2011 heating seasons. These changes in eligibility increased the number of customers receiving bill discounts through 2012 which subsequently dropped off in 2013. The funding of the electric Low Income discount totaled \$2,480,722 in 2013 for the 12,389 low income customers served. The amount of money required to fund of the bill discount fluctuates annually based upon the number of customers enrolled, rates, and weather.

The Free Weatherization Program

NorthWestern Energy partners with MDPHHS and local HRCs to offer the Free Weatherization Program.

The commitment of federal funds to Low Income weatherization through ARRA dramatically increased funding available to weatherize low income homes in Montana over the three heating seasons leading up to 2012. Federal funding for the 2012-2013 and 2013-2014 seasons has been reduced. In response to the Federal funding fluctuations, and in cooperation with MDPHHS, NorthWestern Energy has made annual modifications to the Free Weatherization Program contract with MDPHHS in an ongoing effort to better maximize the weatherization results of all funding sources for NorthWestern Energy low income customers. As a result of collaborative activities in 2012, NorthWestern Energy and MDPHHS restructured the 2013 contract to adjust the allowed HRC overhead and/or administrative costs and to better mirror the federal program requirements. In addition USB funds up to 100% of weatherization for homes

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

where NorthWestern Energy is listed as the heating vendor and up to 50% of weatherization for homes where the NorthWestern Energy customer does not list NorthWestern as the heating vendor. In addition to accommodating significant decreases in federal funding, this provides for important administrative streamlining of the program for the HRCs and MDPPHS. While this contract change reduces the number of homes reported as weatherized with USB funds for the same funding level in comparison to previous years, it does not reduce overall federal funding directed to weatherization of the homes of NorthWestern Energy's low income customers.

The 2013 Free Weatherization Program pooled 2012 and 2013 electric USB funds, along with 2013 natural gas funds to complete \$2,242,556 of low income weatherization work for 427 low income customers in 2013. An additional \$413,850 of 2013 funds has been committed to weatherization to be completed in 2014. As noted in the Addendums to the 2011 and 2012 reports, previously unspent large customer funds have been reallocated to Free Weatherization to be completed in 2014.

The Free Weatherization program includes a comprehensive energy audit, installation of air-sealing, hot water conservation, insulation measures and compact fluorescent light bulbs, and energy related health and safety improvements such as heating equipment tune-ups and repairs. Customers whose homes are heated primarily with electricity from NorthWestern Energy are considered for conversion to natural gas. Customers are provided with information to help them better manage their energy usage and to better understand their energy costs.

Customers served through the program provide comments back to NorthWestern Energy about their experiences through letters and customer response cards handed out by the HRCs.

- **“Thank you for all the hard work your program does for low income families. We really appreciate the new windows, doors and company of friendly employees. God bless you all.”**
- **“Words can’t express how thankful I am. If it wasn’t for you and NW I wouldn’t be able to get this done, especially my furnace. Thank You!!”**
- **“They did an excellent job with their workmanship and courtesy. I am very thankful and grateful for all they did.”**
- **“It was a great experience. Thanks so much. I feel warmer and safer!!”**

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Energy Share

Energy Share of Montana offers assistance to those facing heating emergencies. It is intended to be a one-time, last resort safety net, used after all other resources have been exhausted. MPSC Order No. 6679e retained the total annual commitment of USB funds to Energy Share at \$575,000 with \$239,000 being allocated from the electric USB funds and the balance from natural gas USB funds. During 2013, \$239,000 of 2013 electric USB funds was provided to Energy Share. Additional funds from the non-low income categories in the amount of \$177,364 have been committed to Energy Share for payment in 2014. As noted in the Addendums to the 2011 and 2012 reports, previously unspent large customer funds have been reallocated to Energy Share for payment in 2014.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Local Conservation Activities-- \$ 1,238,110

The mix of energy conservation and market transformation programs offered by NorthWestern Energy with USB funding has been more limited as some programs have been shifted to the electric supply portfolio as demand side management (DSM) acquisition. The primary focus of the USBC-funded energy conservation and market transformation programs is to provide energy savings across customer sectors--residential, commercial, institutional, and small industrial facilities on NorthWestern Energy's system. Customers meeting Large Customer USB criteria are not eligible to participate in these USBC funded programs.

Efficiency Plus (E+) Energy Audit Program

The E+ Audit for the Home is an on-site energy audit program for residential customers whose space and/or water heating fuels are delivered by NorthWestern Energy. It is a flagship of energy efficiency for NorthWestern Energy's non-low income customers. The E+ audit includes the installation of water-related energy efficiency measures that start saving right away. Customer education about where their energy dollar is going is supported through a blower door analysis, a natural gas appliance inspection for customers whose natural gas is delivered by NorthWestern Energy, and with specific suggestions for customers to better manage their homes or change behaviors to achieve greater energy-efficiency. Customers receive a report specific to their home and energy use habits. The report breaks out historical energy usage by end-use, provides recommendations on cost-effective weatherization measures, and offers tips on energy-efficient practices and natural gas appliance maintenance. Demand for energy audits has increased in recent years and additional funds have been allocated to this program to the extent available. The pool of 2012 and 2013 electric USB funds, along with 2013 natural gas funds allowed for the completion of nearly 3,000 on-site residential audits in 2013.

NorthWestern Energy *electric baseload-only customers (no space heat or water heat fuels delivered by NorthWestern Energy)* are offered a separate audit service. The E+ Energy Survey is a mail-out audit for baseload customers consisting of a survey mailed to residential customers with specific consumption profiles. Customers complete and return the survey; they receive a report similar to the on-site E+ Audit report. In addition to breaking out the historical energy usage by appliance end-use, the report includes customer-specific recommendations for appliance usage in the customer's home. General weatherization and water heating recommendations are provided. With the combination of the on-site audit, the Free Weatherization program, and the E+ Energy Survey, almost every NorthWestern Energy residential customer has an energy efficiency assessment tool available for their home. Nearly 4,500 residential electric customers participated in the E+ Energy Survey program in 2013.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Customers are provided the opportunity to comment to NorthWestern Energy regarding the E+ Audit for the Home:

- **Answered our questions – were courteous and thorough – good experience – would recommend!**
- **I appreciate this program and feel that it is and will be helpful for my household.**
- **This is a great program and the staff did an excellent job. We have encouraged multiple people to sign up.**
- **Very nice guys and they did a great job. This program offers great value and importance to consumers. Thank you.**
- **Very professional. The audit was more extensive than expected. Well done.**

The E+ Energy Appraisal Program for Businesses focuses on identifying electric conservation opportunities for commercial customers on NorthWestern Energy's electric distribution system with a primary emphasis on smaller, "main street" businesses. In addition to the obvious lighting efficiency opportunities, many small businesses benefit from a greater understanding of where their energy dollar is going within their operation and the significance maintenance plans can have on their energy use and bills. In 2013, more than 300 commercial facilities were evaluated through this program offering with 2012 and 2013 electric USB funding.

Efficiency Plus (E+) Business Partners Program-New/Retrofit/Irrigation

Most of the NorthWestern Energy's E+ Business Partners Program activity is funded as DSM through electric supply rates. Irrigation projects and those electric non-Large commercial Customers in Choice may qualify for the USB-funded portion of the program. Incentives are offered for energy conservation and load management projects in new and retrofit applications. Projects under this program frequently take more than a year to develop and implement.

In 2013, 5 irrigation efficiency improvement projects were funded and completed with 2013 USB dollars. While in past years projects were provided rebates for commercial electric Choice customers for non-lighting electric efficiency improvements, no projects were received from this group of customers in 2013.

Customers qualifying for "Large Customer" USBC are not eligible for this USB funded program.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Market Transformation – \$243,855

Market Transformation is the process of bringing more energy efficient products, practices, and services into the marketplace with a goal of changing behaviors, practices, standards, and markets in such a way that the market, rather than an interventional program or activity, supports energy efficiency.

ENERGY STAR® and New Homes

Homes built to the Northwest ENERGY STAR standards are on the increase in Montana despite declines in the new housing market. USB funds provide to outreach for the Northwest ENERGY STAR homes program including builder and verifier training and program promotion continues to be funded as a USB market transformation program. Additionally, USB funds were used to provide training and develop educational information related to Montana's adoption of the 2009 Energy Code and in anticipation of the 2012 Energy Code for builders, trade allies and the general public.

Motor Management and Building Operator Certification Training

Training and education are important components in moving customers to more energy efficient products and practices that provide benefits to NorthWestern Energy's customers. These two market transformation activities provide quality, regionally and nationally recognized training sessions to qualifying customers and trade allies at little or no cost to participants. These activities help support other electric energy efficiency programs of NorthWestern Energy.

Regional Market Transformation

NorthWestern Energy has directed 2013 market transformation funds to regional collaborative and training efforts. Training focused on technical training targeting industrial customers and trade allies.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

***Renewable Resources, and
Research and Development--\$1,283,947***

Renewable energy development as a public purpose category was initiated with the Universal System Benefits programs in NorthWestern Energy's service territory in 1999. The Research and Development activities funded in 2013 were tied to renewable resources, so the two categories have been combined for this discussion. Costs for the separate categories are broken out in the appendices. Projects that maximize the partnering of funding and/or benefits are encouraged.

There are now more than 1,100 net-metered renewable generators in the NorthWestern Energy service territory with a large majority of the systems having received USB funds. Additionally, through the years, USBC has provided funding toward projects without net-metering, most notably for some solar thermal systems and one biomass project. Residential solar Photovoltaic (PV) projects represent the majority of USB funded projects.

There were 106 projects completed in 2013, with a majority of these projects funded with 2012 dollars. Most projects completed in 2013 were installed on private residences. A handful of PV systems were installed at schools and non-profit facilities. At schools, the systems provide an educational opportunity for students to learn about the capabilities of renewable generation. The size of systems installed on schools ranged between 2.45 and 8kW. The majority of PV systems were 2 kW or smaller.

Projects completed in 2013 with funds from previous years are noted in the Addendums to the 2011 and 2012 reports.

The following table summarizes renewable projects that have received USB funding and were completed by the end of 2013.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

USB Renewable Projects 1999-2013		
Facility Type	#	KW
Commercial Projects	53	345.23
Fire Stations	36	81.03
Irrigation Projects	6	103.52
Low Income	52	226.46
Non-Profit Projects	48	144.63
Private Residences	728	2052.43
Schools	66	267.52
Other Public Buildings	19	288.27
Biomass	1	750.00
Solar Thermal	19	NA
Biodiesel	2	15.00

NorthWestern Energy has instituted safety and experience qualification requirements for solar PV and small-scale wind installers. Since 2009, installers receiving USB Renewable Resources funds must meet safety and experience requirements. At the end of 2013, 34 businesses met the solar PV qualification requirements and six businesses met the small-scale wind qualification requirements. These installers are listed on NorthWestern Energy's website. The Installer listing is updated as installers are added or deleted based upon their meeting the qualified installer requirements.

USB funds are used in partnership with the Montana Renewable Energy Association (MREA) and the Occupational Safety and Health Administration (OSHA) to provide safety training to installers of small renewable generation systems. NorthWestern Energy sponsored one (1) two-day conference and one (1) one-day conference in Helena in 2013. These conferences covered a variety of topics including, OSHA electrical safety, Four Hazards Training, Fall Protection, and NFPA 70E. Additional training for installers has been committed to for 2014. The qualified installers, as well as several program contractors, provide education, project development services and rebates to residential and commercial customers. Seminars, tours, workshops and exhibits for individuals interested in renewable energy technologies and sustainable building practices continue to be funded. In 2013, NorthWestern Energy, through a partnership with the National Center for Appropriate Technology, supported two Energy Corps members whose work included renewable education in a variety of public settings with an emphasis on children (pre-school age through high school) as the audience.

NorthWestern Energy initiated the E+ Green Power program in 2003. Through this program, customers may elect to purchase the environmental benefits associated with

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

renewable energy generated in the Northwest and Wyoming. USB funds have been used to support the marketing of the program and revenues that are greater than expenses are returned to the Renewable Resources category and directed to other renewable projects. In 2013, funds were returned to the renewable energy category. Customer interest in this program has been sustained; the majority of participating customers are homeowners, but the majority of the E+ Green blocks of environmental benefits associated with renewable generation are sold to a handful of commercial accounts.

NorthWestern Energy continues to consult with its USB Renewable Advisory Subcommittee regarding allocations of Renewable Resources and Research and Development funds and works to maintain a mix of projects with diverse geographic distribution, and to a mix of public, non-profit, and private electric customers.

**NorthWestern Energy
Electric
Universal System Benefits Activities
2013 Annual Report**

Conclusion

In every year since the inception of USB, NorthWestern Energy's activities have covered all public purpose categories—Low Income, Local Conservation, Market Transformation, Renewable Resources and Research and Development, *and*, the offerings have included all customers—low income, senior citizens, and other residential customers; main street businesses, schools and also government, office buildings, irrigation, and small industrial companies (with the exception of the Large Customers, who may self-direct USB funds).

Programs and funding activities continue to be coordinated by NorthWestern Energy staff with much of the implementation work being performed by others. The Free Weatherization Program is a cooperative effort between NorthWestern Energy, MDPHHS, and the local HRCs. The HRCs also qualify customers for the utility's bill discount, free weatherization and emergency bill assistance through Energy Share.

NorthWestern Energy collects the natural gas USBC from its customers and implements Low Income bill assistance and weatherization, and residential conservation activities. MPSC Order No. 6679e recognizes and allows for the pooling of electric and natural gas USB funds for residential on-site audits, Free Weatherization for low income customers, and emergency assistance through Energy Share of Montana. The natural gas USB activities are funded and implemented consistent with law and MPSC direction. Additional cost-effective energy efficiency, demand side management (DSM), programs for NorthWestern Energy customers are funded through electric and natural gas supply rates as part of NorthWestern Energy's supply portfolios.

Addendums for the years 2009, 2011, and 2012 are included to provide an update of funded USB activities that were completed this past year.

Find out more about NorthWestern Energy USB programs by visiting www.NorthWesternEnergy.com/Eplus.

Allocation as % of Revenues, excluding Large Customer Revenues	100%	47%	24%	9%	16%	6%	3%	1%
--	------	-----	-----	----	-----	----	----	----

(a) SB 390 required that utilities collect 2.4% of their 1995 electric revenues to fund approved USB activities, and direct 17% of the total to the low income category. The allocation set forth by MPSC in Order 5986g increased NorthWestern Energy's low-income requirement to 21% of total revenues. While this adjustment did not affect the allocation for Large Customers, it effectively reduced the amount of USB funds available for other USB categories. In December 2008 MPSC issued Order 6679e, which reallocated funds as shown above.

(b) The historic allocation table illustrates the expenditure or direction of electric USB by category from 1999 through 2013.

(c) This column summarizes all funds reallocated to low-income activities by NorthWestern Energy, except those noted in (d). In addition to funds reallocated by NorthWestern Energy, Large Customers have self-directed \$2,330,787 to low-income activities since 1999.

(d) 2003 Supplemental low income funds reallocated based on a recommendation from the Governor's Energy Consumer Protection Taskforce, and MPSC Order 6514. 2005 Supplemental low-income funds reallocated based on a stipulation reached between NWE, District XI HRC, AARP, RNP & NRDC in Docket D2004.6.90, Order 6574c.

2013 Annual Report

ADDENDUM 2012 REPORT

**ADDENDUM
to the
2012 Report**

The 2012 NorthWestern Energy USBC revenues totaled \$9,372,359. Of this \$7,103,020 was spent on projects completed in 2012, and \$1,994,822 was spent on projects completed in 2013, leaving a balance of \$274,517 of projects to complete in 2014.

The projects associated with \$1,994,822 of 2012 USB funds, including \$347,709 Large Customer self-directed activities, were completed in 2013. The results are included in Appendix 2 of this addendum.

Included in the 2013 expenditures, NorthWestern Energy reallocated \$11,866 of unspent Large Customer 2012 funds to cover a portion of the deficit in the 2013 Large Customer category. Historically, unspent Large Customer funds were available to cover the NorthWestern Energy administrative costs associated with the Large Customer category. This was not the case in 2012 or 2013.

Additional unspent 2012 Large Customer funds identified were reallocated to Low Income activities with \$6,008 directed to Energy Share and \$14,019 directed to the Free Weatherization program for support of low income customers in 2014.

NorthWestern Energy requested and was granted extensions from the Department of Revenue as allowed per ARM 49.29.111 for renewable generation and research and development projects totaling \$254,490 for completion in 2014.

Updated results are provided in the 2012 Addendum in Appendices 2 and 3 (p. 2012-2 and p. 2012-3).

Benefits Activities
2013 Annual Report**

ADDENDUM 2011 REPORT

**ADDENDUM
to the
2011 Report**

The 2011 NorthWestern Energy USBC revenues totaled \$9,367,205. Of this \$6,687,730 was spent on projects completed in 2011, \$2,208,649 was spent on projects completed in 2012, and \$340,003 was spent on projects completed in 2013, leaving a balance of \$130,825 of projects to complete in 2014.

The projects associated with \$340,003 of 2011 USB funds were completed in 2013. The results are included in Appendix 2 of this addendum.

Included in the 2013 expenditures, NorthWestern Energy reallocated \$34,568 of unspent Large Customer 2011 funds to 2013 Low Income activities. An additional \$7,496 unclaimed Large Customer 2011 funds was identified during 2013. These funds have been reallocated by NorthWestern Energy with \$2,249 directed to Energy Share and \$5,247 directed to the Free Weatherization program. The reallocation of unspent Large Customer funds to a Low Income activity is consistent with historic allocation of such funds.

NorthWestern Energy requested and was granted extensions from the Department of Revenue as allowed per ARM 49.29.111 for a research and development project totaling \$123,329 for completion in 2014.

Updated results are provided in the 2011 Addendum in Appendices 2 and 3 (p. 2011-2 and p. 2011-3).

2013 Annual Report

ADDENDUM 2009 REPORT

ADDENDUM
to the
2009 Report

The 2009 NorthWestern Energy USBC revenues totaled \$9,361,819. Of this \$6,502,172 was spent on projects completed in 2009, \$2,130,902 on projects completed in 2010, \$644,648 in 2011, \$64,811 spent in 2012, and \$9,285 on a single project to complete in 2013.

Market Transformation

The project to which 2009 funds have been previously been committed was completed in 2013 for \$6,580 less than anticipated. These funds were reallocated to 2013 low income activities.

Updated results are provided in the 2009 Addendum in Appendices 2 and 3 (p. 2009-3 and p. 2009-4).

RE: Montana-Dakota Utilities Co.
2013 Electric USB Report

Montana-Dakota Utilities Co., a Division of MDU Resources Group, Inc. herewith submits its Annual Report regarding Universal System Benefit Programs (USBP) pursuant to MCA § 69.8.402 (8) as part of the Electric Utility Industry Restructuring Law.

In accordance with 69-8-402 (MCA) Montana-Dakota, hereby submits the funds collected in 2013 that exceeded the credits for internal programs and large customer credits of \$136,952.93 described in the attached report.

Please acknowledge receipt by stamping or initialing the duplicated copy of this letter attached hereto and returning the same in the enclosed, self-addressed, stamped envelope.

Sincerely,

A handwritten signature in dark ink that reads 'Tamie A. Aberle'.

**Montana-Dakota Utilities Co.
Universal System Benefits Program
2013 Annual Report**

The total dollars collected under the Universal System Benefit Charges (USBC) approved by the Montana Public Service Commission (Commission) during the period January 1, 2013 through December 31, 2013 was \$1,018,698.26. The large customer group, defined as customers with monthly electric billing demands of 1,000 kW or higher, accounted for \$281,378.59 of the total amount collected.

The following USBP expenditures were made in calendar year 2013 in accordance with programs approved by the Commission:

Low-Income Discount	\$261,889.23
Low-Income Weatherization	152,000.00
Low-Income Energy Audits	10,000.00
Energy Share Endowment & Admin	35,000.00
Low-Income Furnace Safety	50,000.00
Low-Income Bill Assistance	90,000.00
Conservation Programs	12,771.26
Total Montana-Dakota Programs	<u>\$611,660.49</u>

Following is a description of each program:

Montana-Dakota offers a low-income discount to all customers that have qualified for Low-Income Energy Assistance (LIEAP). The discount remains in place on a calendar basis and qualifying customer's accounts are updated annually upon the start of the LIEAP qualification process the following heating season. Beginning with the 2008-2009 LIEAP season (first LIEAP payments were received November 18, 2008) customers qualifying for LIEAP also qualified for a discount on their electric bill based on a new discount structure filed as part of the Stipulation in Docket No. D2006.1.2 and approved by the Commission on

August 20, 2008. Three levels of discount are available under this discount rate structure; 30% discount for customers at 0-60% of the federal poverty level, 25% discount for customers at 61-90% of the federal poverty level and a 20% discount for customers at 91% to the ceiling of the federal poverty percentage of income as established by the Department of Health and Human Services in determining LIEAP benefits.

The income data used to administer the discount is received from the State Department of Health and Human Services at the time a customer qualifies for LIEAP. When combined with a LIEAP benefit, the bill discount serves to mitigate the higher percentage of disposable income necessary to pay utility bills that this group of customers pays in comparison to other customers. Following are statistics regarding the distribution of the electric discounts among the various discount levels based the percentage of poverty for calendar year 2013. On average, 2,188 customers received benefit of the discounts with the months or number of bills discounted for each customer dependent upon the time LIEAP benefits were first received on their behalf.

Low Income Discounts January 1, 2013- December 31, 2013

% of Federal Poverty/Age	Discount	Customers	Average Discount/Bill
0-60%	30%	600	\$(24.45)
61-90%	25%	642	(18.37)
91%-ceiling %	20%	946	(16.17)

The other low-income related programs include weatherization, energy audits, bill assistance and a furnace/water heater repair program. These programs provide assistance to low income customers located in Montana-Dakota's service territory. The bill assistance and furnace/water heater programs are administered by Energy Share of Montana in accordance with their established guidelines to provide assistance to qualifying low-income customers. In 2013, eighty households received bill assistance at an average of \$308 per household.

The furnace safety program recognizes the problem that arises when a low-income customer is faced with a costly repair bill or in some cases the cost of replacing space or water heating equipment. Forty-six households were assisted through this program in 2013. The Weatherization and Energy Audit Programs are administered by Action for Eastern Montana in accordance with guidelines established by the State Department of Health & Human Services and the Department of Energy and assist low-income customers with conservation measures that result in energy savings. Weatherization services were provided to thirty-six households utilizing USB funds in 2013 at an average cost of \$1,538 per household.

The Energy Share endowment will provide for the long-term needs of the low-income customers of Montana by providing a stable funding source for energy assistance dollars and is a cost effective program that will benefit Montana-Dakota's customers. Customer education consists of outreach required to better inform customers of the available assistance programs noted above and the Federal LIEAP program. Bill inserts, web site promotion and advertising done in conjunction with Energy Share of Montana were tools utilized in 2013. Montana-Dakota has developed a package of bill inserts, posters and direct mail pieces to assist with educating customers regarding assistance available under the programs.

In addition to the low-income related conservation programs, funds were also made available for all residential and commercial customers for conservation measures. The cost effectiveness of the conservation program offerings was determined based on the cost/benefit analyses provided in the Company's Integrated Resource Plan filed in Docket No. N2011.8.70. In 2013 four customers were issued a rebate under the Commercial Lighting program for installing qualifying lighting system retrofits for fluorescent T8 or T5 lamps, electronic ballast compact lamps or exit signs equating to annual energy savings

of 142,331 Kwh. Seven rebates were also provided for replacement of cooling equipment resulting in annual energy savings of approximately 2,200 Kwh.

As noted above, a total of \$281,378.59 was collected from the Large Customer Group. In accordance with 69-8-402 (MCA) the Large Customer Group has the right to self-direct funds collected through the USBC. Funds totaling \$270,084.84 will be refunded to the Large Customer group.

In accordance with 69-8-402 (MCA) Montana-Dakota, hereby submits the unexpended balance of \$136,952.93 to the Department of Revenue. The determination of this amount is summarized below:

Total USB Funds Collected	\$1,018,698.26
Less: Program Expenditures	
Low-Income Discount	261,889.23
Low-Income Weatherization	152,000.00
Low-Income Energy Audits	10,000.00
Energy Share Endowment & Admin	35,000.00
Low-Income Furnace Safety	50,000.00
Low-Income Bill Assistance	90,000.00
Conservation Programs	12,771.26
Total Montana-Dakota Programs	<u>\$611,660.49</u>
Less Large Customer Self-Directed Funds	270,084.84
Amount to Remit to Department of Revenue	<u><u>\$136,952.93</u></u>
