*To whom it may concern:*

*As a MT. ASCP, NCA, CLS for 40 plus years and a strong advocate for licensure, I am writing to protest the elimination of the CLS Board and for that matter the RAD and RCP Boards. I was Chairman of the CLS board for 8 years and I find it interesting that all the medical boards are being questioned except for Nursing—who by the way tried to do our job with no oversight, quality control or knowledge of what the results meant. Facilities hiring people do not necessarily know what the qualifications should be. Furthermore most certifying agencies do not require continuing education as our board does and before licensure a lot of people did not do any continuing education.*

*As far as the complaints I find them interesting and ludicrous. Thank you for your consideration.*

*Sincerely,*

*Karen I. McNutt MT. ASCP, CLS,*
