

The Montana Association of Medical Staff Services (MTAMSS), with a membership of 66 strong across the state of Montana, promotes the development of individuals who are responsible for managing credentialing and privileging in practitioner/provider organizations and regulatory compliance in Montana's diverse healthcare industry. MTAMSS is very concerned with the timeliness and response from the Montana Board of Medical Examiners in regards to licensing providers in the state of Montana who treat patients who have come to our facilities for their medical care. When this process is delayed it greatly affects the quality of patient care available.
