

Oil Tax Revenue, Production and Price

Note - This axis is for both the production line and the price line
Barrels Per Day (Thousands) & Price in \$ per Barrel

The chart shows daily oil production and price per barrel as well as the total amount of oil tax revenue collected by the state. Revenue data is available by fiscal year and has been adjusted to correspond correctly to the calendar year for production. The last production data point available is January of 2014.
